

PRODUCTION REFERENCE · SUPPLEMENTARY BRIEF

Training Content Shot List

Mount Dora · Friday, August 28, 2026

For: Giovanna (Rome's Flavours), Shelbi (SwyFox), Marion Johnson (production)

What this is, and why it is separate

Rome's Flavours is building a staff training course that will run on the website. The modules will be presented by an on-screen avatar, and the avatar needs something to point at. Telling a new server how to clear a course is far less effective than showing them.

Since we will already be at Mount Dora with a camera, a dressed restaurant and food being cooked, this is the cheapest opportunity we will ever have to capture that demonstration material.

This list is kept separate from the marketing brief on purpose. The six reels and the photo library are the priority for the day and nothing here should compete with them. Treat this as a defined block of work, not something to be squeezed between the main setups.

Suggested: a 60 to 90 minute block, ideally after the food photography is complete, while the dishes and the room are still dressed.

DELIVERY: RAW FILES ONLY

Everything on this list is delivered raw and unedited. No color grading, no editing, no music, no captions.

This is deliberate. The marketing deliverables are the graded, finished work. Training footage gets cut against a narration script that does not exist yet, so finishing it now would only mean redoing it later. SwyFox will handle assembly when the modules are built.

Practically, that means this block adds shooting time on a day already booked, and no post-production. Please hand over the source files alongside the main delivery.

Three principles that make this footage last

1. HANDS AND POINT OF VIEW, WHEREVER POSSIBLE

The single most useful thing we can capture is **hands only, and over-the-shoulder point of view.**

Why it matters: staff change. A module built around a recognizable server's face has to be reshot when that person leaves. A module built around a pair of hands carrying three plates correctly is good for years. It also avoids needing

permission from individuals for footage that will be reused indefinitely.

Default to hands and POV. Use faces only where the module is genuinely about a person, such as greeting a guest.

2. SHOW THE RIGHT WAY AND THE WRONG WAY

Training footage is far more effective in pairs. The correct technique, then the common mistake.

Wherever a shot is marked **PAIR**, we want both: the correct version, then the incorrect one. They cut together into a single teaching moment.

3. CLEAN, NEUTRAL, REPEATABLE

Consistent framing, even lighting, no dramatic grade. Marketing footage should be cinematic. Training footage should be clear. If a trainee cannot see exactly where the thumb is on the plate, the shot has not done its job.

Technical notes for Marion

- **Format:** shoot 16:9 for training. The course plays on a webpage and on desktop, not on a phone feed. This is the opposite of the reels
 - **Also capture vertical** where it is quick to do so, for future short-form reuse
 - **Audio is not required.** These will be voiced by the avatar. Clean sound is a bonus, not a requirement
 - **Keep clips short.** Five to fifteen seconds per action is right. We are cutting to a narration, not telling a story
 - **Avatar plates:** we need several static, empty, well-composed shots of the room with nothing happening in them. Dining room, bar, service station, entrance. These become backgrounds the presenter is placed against. Lock the camera off, no movement, hold for 15 to 20 seconds each
 - **Continuity:** if possible keep the same server in the same uniform for the whole training block, so modules cut together cleanly
-

Tier 1: must capture

If time runs short, these are the ones that matter. They map directly to modules that currently have no visual material at all.

SERVICE TECHNIQUE

#	Shot	Format	Notes
1	Carrying three plates correctly	Video, hands and forearms	PAIR. The grip is the lesson
2	Serving a plate from the guest's left	Video, POV and wide	PAIR with serving from the wrong side
3	Clearing a plate from the guest's right	Video, POV and wide	PAIR with reaching across a guest
4	Clearing without stacking at the table	Video, hands	PAIR with stacking, which is the common error
5	Announcing a dish as it is placed	Video, wide, face visible	Short. Needs a person
6	Crumbing down and resetting between courses	Video, hands	
7	Pre-bussing: removing empty glasses and used plates mid-service	Video	

WINE SERVICE

#	Shot	Format	Notes
8	Presenting the bottle, label toward the guest	Video, hands and bottle	The ritual matters here
9	Opening at the table, full sequence, foil to cork	Video, hands, close	Shoot this one generously. It is a whole module
10	Pouring: position, quantity, the finishing turn	Video, hands	PAIR with overpouring
11	Holding glasses by the stem, never the rim	Stills and short video	PAIR
12	Glass types side by side	Stills	Red, white, sparkling, water

TABLE SETTING

#	Shot	Format	Notes
13	A correctly set table, lunch	Still, overhead and 45 degrees	The reference image
14	A correctly set table, dinner	Still, overhead and 45 degrees	
15	Setting a table from bare to complete	Video, timelapse or sequence	
16	Napkin fold, house standard	Video, hands, close	

THE ROOM

#	Shot	Format	Notes
17	Static plates of dining room, bar, service station, entrance, patio	Video, locked off, 15 to 20 seconds each, empty	Avatar backgrounds. Important
18	On stage areas: dining room, patio, entrance, host stand	Stills	For the on-stage and backstage module
19	Backstage areas: service station, kitchen pass, storage	Stills	Same module, the contrast is the point

Tier 2: high value if time allows

ARRIVAL AND GREETING

#	Shot	Format	Notes
20	Host greeting guests at the entrance	Video, wide, faces	Needs people
21	Walking guests to a table, menus in hand	Video, following	
22	Presenting menus at the table	Video	
23	Correct posture at the host stand	Still and video	PAIR with leaning or looking at a phone

ORDER TAKING AND POS

#	Shot	Format	Notes
24	Writing an order at the table, notepad visible	Video, over the shoulder	
25	The seat numbering system in use	Video or animated still	The pivot method is hard to teach in words
26	Entering an order at the POS terminal	Video, screen and hands	The POS module currently has no content at all
27	Tickets printing and being separated	Video	

PROFESSIONAL STANDARDS

#	Shot	Format	Notes
28	Correct uniform, head to toe	Stills, front and side	The visual standard
29	Hands and nails, presentation standard	Still, close	Stated explicitly in the course
30	Correct posture and open body language on the floor	Video	PAIR with closed or slouched

OPERATIONAL PROCEDURES WITH NO WRITTEN CONTENT

These modules are currently empty headings. Footage would carry them almost entirely.

#	Shot	Format	Notes
31	Drink preparation, start to finish	Video, hands	
32	Restocking a service station	Video	
33	Opening or closing checklist walkthrough	Video, sequence	
34	Wine storage and handling	Video	

Tier 3: opportunistic

Capture these only if the day is running ahead. Most can be picked up as by-products of the food photography.

PRODUCT AND MENU KNOWLEDGE STILLs

The menu knowledge module needs images far more than words. Most of these will already exist from the main shoot, so this is largely a matter of making sure nothing is missed.

- **Pasta shapes, separated and labelled:** fettuccine, tagliolini, pappardelle, angel hair, ravioli, gnocchi
- **Signature sauces, individually:** Bolognese, Carbonara, Cacio e Pepe, Pesto, Amatriciana, Puttanesca
- **Key ingredients, close and clean:** guanciale, Pecorino Romano, Grana Padano, prosciutto, speck, burrata, Gorgonzola, extra virgin olive oil
- **Dough and fermentation:** dough rising, being worked, going into the oven
- **San Benedetto water**, since it is part of the story
- **Every plated dish on a clean neutral background**, straight down and at 45 degrees

KITCHEN AND CRAFT

- Pasta being made by hand
- Pizza being stretched and dressed
- The pass during service

What we do not need

To keep the block tight, we are not capturing:

- Anything requiring a script or dialogue. The avatar speaks
- Long unbroken takes. Short actions cut better
- Heavy stylisation. Save the grade for the reels
- Anything involving a real paying guest, unless they have given permission

Permissions

Anyone who appears on camera in the training material needs to agree to it, because training content is reused over a long period and is shown internally to every new hire.

Please have anyone appearing sign a simple release on the day. SwyFox will supply the form. This applies to staff and to anyone brought in to appear as a guest.

This is straightforward, but it is much easier to handle on the day than to chase afterwards.

In short

Three things to protect if the day gets tight:

1. **The static empty room plates.** Without them the avatar has nowhere to stand
2. **The service technique pairs.** Carrying, serving left, clearing right, no stacking
3. **The wine opening sequence.** It is a whole module on its own

Everything else can be picked up later. Those three are far cheaper to get on 28 August than on any other day.

Prepared by SwyFox LLC. Supplementary to the Mount Dora production brief.
